Company Summary

AE Security Group. (AE), is a group of highly skilled individuals who have over 20 years experience providing PLC, HMI, touch screen, locking control, CCTV, access and intercom systems.

AE's strength comes from it's ability to deliver turnkey security solutions requiring the design, installation and programming of HMI/PLC based automations systems and their related components. We bring expertise beyond that of most electrical and security sub-contractors.

We thrive on critical security projects such as correctional facilities, research and development facilities, banks, hospitals, manufacturing complexes, schools and college campuses, commercial office buildings, and government and military facilities. We provide timely integration of complex security control systems with top line products and "off the shelf" software tailored to specific project requirements.

Professional Services

AE provides the following professional services;

- Strategic security consulting, needs assessment
- Turnkey security integration services including submittals, documentation materials acquisition, installation, networking, testing and servicing
- Programmable Logic Controller (PLC) specialists; panel design, build, install, program, train and support
- HMI and SCADA design and installation
- Access Control, CCTV, Intercom, Public Address, networks and control integration

- Prisons
- Jails
- Detention Centers
- Court Houses
- Retail Stores
- Education
